DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-2 and 4-6 are, drawn to a process for continuous production of a water-absorbent resin by steps of: (A) measuring a water-absorbent resin having predetermined property; (B) separating a predetermined amount of water-absorbent resin; and (C) mixing at least a portion of the product in step (B) with a water-absorbent resin in step (A), classified in class 521, subclass 53, 54, 64, 149.
 - II. Claims 3is, drawn to a process for continuous production of a waterabsorbent resin with a step (A) specified in claim, and such that said process involves a change of a production condition in accordance with results of the aforementioned measurement, classified in class 523, subclass 337.
 - III. Claims 7-8 are, drawn to a process for continuous production of a waterabsorbent resin comprising steps of continuously produce particles of said water-absorbent resin that are measured by a laser diffraction scattering method, classified in class 356, subclass 361.
- IV.. Claims 9-10 are, drawn to a water-absorbent resin product that is crosslinked and having specified characteristics in the present claims, classified in class 526, subclass 380, 379, 382, 384.

Application/Control Number: 10/724,895

Art Unit: 1711

The inventions are distinct, each from the other because of the following reasons:

Page 3

2. Inventions of Groups (I, II and III) and Group IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as polymerization of polyvinylpyridine.

- 3. Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different function including any other functions that are different from Group I.
- 4. Inventions of Groups (I and II) and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different function because the invention in Group III requires a laser diffraction scattering method analysis.

Art Unit: 1711

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Garrett Davis on August 17, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olga Asinovsky whose telephone number is 571-272-1066. The examiner can normally be reached on 9:00 to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
